Patellar Exam	er or authorized re		. Classification of luxation		
Patellar Exam 1. Normal			☐ Grade 1—The patella easily	luxates manually at full extension of the	
Patellar Exam I. Normal Ziright	ination Results		Grade 1—The patella easily stifle joint, but returns to the t	rochlea when released.	
Patellar Exam 1. Normal 🗹 right	ination Results Aleft on	3	Grade 1—The patella easily stifle joint, but returns to the t Grade 2—There is frequent	rochlea when released. patellar luxation which, in some cases,	
Patellar Exam 1. Normal 2 right 2. Patellar Luxati 3 bilateral 3 unilateral	ination Results Left on right	3 □ left	☐ Grade 1—The patella easily stifle joint, but returns to the t☐ Grade 2—There is frequent becomes more or less permar	rochlea when released. patellar luxation which, in some cases, pent.	
Patellar Exam 1. Normal 2 right 2. Patellar Luxati 3 bilateral 4 unilateral 5 luxated:	ination Results Left on right medial	left lateral	☐ Grade 1—The patella easily stifle joint, but returns to the t☐ Grade 2—There is frequent becomes more or less permar☐ Grade 3—The patella is permar☐ Gra	rochlea when released. patellar luxation which, in some cases,	
Patellar Exam 1. Normal 2. right 2. Patellar Luxati 3 bilateral 4 unilateral 5 luxated: 6 luxation is:	ination Results Left on right medial intermittent	left lateral permanent	□ Grade 1—The patella easily stifle joint, but returns to the t □ Grade 2—There is frequent becomes more or less permar □ Grade 3—The patella is permand deviation of the tibial crefrom the cranial/caudal plane	rochlea when released. patellar luxation which, in some cases, nent. manently luxated with torsion of the tibia st of between 30 degrees and 50 degrees	
Patellar Exam 1. Normal Tright 2. Patellar Luxati bilateral unilateral luxated:	ination Results Left on right medial	left lateral	☐ Grade 1—The patella easily stifle joint, but returns to the t☐ Grade 2—There is frequent becomes more or less permar☐ Grade 3—The patella is permand deviation of the tibial crefrom the cranial/caudal plane☐ Grade 4—The tibia is media	patellar luxation which, in some cases, nent. manently luxated with torsion of the tibiast of between 30 degrees and 50 degrees. Ily twisted and the tibial crest may show the result that it lies 50 degrees to 90	
Patellar Exam 1. Normal 2. Patellar Luxation bilateral unilateral: luxated: luxation is: age of onset:	ination Results Left on right medial intermittent <2 months 6-12 months	left lateral permanent 2-6 months > 12 months	Grade 1—The patella easily stifle joint, but returns to the to Grade 2—There is frequent becomes more or less permand Grade 3—The patella is permand deviation of the tibial crefrom the cranial/caudal plane Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal procedure.	patellar luxation which, in some cases, nent. manently luxated with torsion of the tibiast of between 30 degrees and 50 degrees. Ily twisted and the tibial crest may show the result that it lies 50 degrees to 90	
Patellar Exam 1. Normal 2. Patellar Luxation bilateral unilateral luxated: luxation is: age of onset: Delicertify that the	ination Results Left on right medial intermittent <2 months 6-12 months	left lateral permanent 2-6 months > 12 months ormed according to the Coog	Grade 1—The patella easily stifle joint, but returns to the to Grade 2—There is frequent becomes more or less permand deviation of the tibial crefrom the cranial/caudal plane Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane DFA procedure.	patellar luxation which, in some cases, nent. manently luxated with torsion of the tibiast of between 30 degrees and 50 degrees. Ily twisted and the tibial crest may show the result that it lies 50 degrees to 90	
Patellar Exam 1. Normal 2. Patellar Luxation bilateral unilateral luxated: luxation is: age of onset: Delicertify that the	ination Results I left I right I medial I intermittent I < 2 months I 6-12 months examination was perforechip/tattoo on this continuous	left lateral permanent 2-6 months > 12 months	Grade 1—The patella easily stifle joint, but returns to the table Grade 2—There is frequent becomes more or less permand deviation of the tibial crefrom the cranial/caudal plane Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane OFA procedure.	patellar luxation which, in some cases, nent. manently luxated with torsion of the tibiast of between 30 degrees and 50 degrees. Ily twisted and the tibial crest may show the the result that it lies 50 degrees to 90 dal plane.	
Patellar Exam 1. Normal 1. Normal 2. Patellar Luxation 2. bilateral 3. unilateral: 4. luxation is: age of onset: 1. DID verify mice Veterinarian Signore Animals over	ination Results Left on right medial intermittent <2 months 6-12 months examination was performed by the control on this con	left lateral permanent 2-6 months > 12 months ormed according to the Coog or I DID NOT ver ecialty: Practitioner	Grade 1—The patella easily stifle joint, but returns to the to Grade 2—There is frequent becomes more or less permand deviation of the tibial crefrom the cranial/caudal plane Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane OFA procedure. If y microchip/tattoo on this dog Specialist Sch Kennel rate:	patellar luxation which, in some cases, nent. manently luxated with torsion of the tibia st of between 30 degrees and 50 degrees. Illy twisted and the tibial crest may show h the result that it lies 50 degrees to 90 dal plane.	
Patellar Exam 1. Normal 2. Patellar Luxation 2. Dilateral 3. Luxated: 4. Luxation is: 4. age of onset: 4. I DID verify mice 4. Veterinarian Signal 5. Animals over A litter of 3 or	ination Results left on right medial intermittent <2 months 6-12 months examination was performed by the control on this control on the control on this control on the control on this control on the contr	left lateral permanent 2-6 months > 12 months ormed according to the Code of	Grade 1—The patella easily stifle joint, but returns to the to Grade 2—There is frequent becomes more or less permand deviation of the tibial crefrom the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane.	patellar luxation which, in some cases, nent. manently luxated with torsion of the tibiast of between 30 degrees and 50 degrees. Illy twisted and the tibial crest may show the result that it lies 50 degrees to 90 dal plane. 5/2/22 Date The group, owned/co-owned by the same person.	
Patellar Exam 1. Normal 2. Patellar Luxation 2. Dilateral 3. Unilateral: 4. Unilateral: 6. Uuxation is: 7. age of onset: 7. Certify that the control of the control	ination Results left on right medial intermittent <2 months 6-12 months examination was performed by the control on this control on the control on this control on the control on this control on the contr	left lateral permanent 2-6 months > 12 months ormed according to the Coog or I DID NOT ver ecialty: Practitioner	Grade 1—The patella easily stifle joint, but returns to the to Grade 2—There is frequent becomes more or less permand deviation of the tibial crefrom the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane.	patellar luxation which, in some cases, nent. manently luxated with torsion of the tibia st of between 30 degrees and 50 degrees. Illy twisted and the tibial crest may show the result that it lies 50 degrees to 90 dal plane. 5/2/22 Date	
Patellar Exam 1. Normal 2. Patellar Luxation 2. Dilateral 3. Unilateral: 4. Unilateral: 6. Uuxation is: 7. age of onset: 7. Certify that the control of the control	ination Results left on right medial intermittent <2 months 6-12 months examination was performed by the second of the second	left lateral permanent 2-6 months > 12 months ormed according to the Codo pecialty: Practitioner \$15.00 each left \$30.00 to left left permanent \$15.00 each left left size size size size size size size size	Grade 1—The patella easily stifle joint, but returns to the to Grade 2—There is frequent becomes more or less permand deviation of the tibial crefrom the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane. Grade 4—The tibia is media further deviation medially with degrees from the cranial/caudal plane.	patellar luxation which, in some cases, nent. manently luxated with torsion of the tibia of between 30 degrees and 50 degrees. Illy twisted and the tibial crest may show the result that it lies 50 degrees to 90 dal plane. 5/2/22 Date sa group, owned/co-owned by the same persons. \$10.00 dalses.	
Patellar Exam 1. Normal 2. Patellar Luxation 2. Dilateral 3. Unilateral: 4. Unilateral: 6. Uuxation is: 7. age of onset: 7.
